Business Employment Incentive Program (BEIP) Annual Report FY2009

In accordance with P.L. 2003, c.166, the New Jersey Economic Development Authority (EDA), submits this report detailing Fiscal Year 2009 activity for the Business Employment Incentive Program (BEIP).

As required by statute, the report includes the following: the number of BEIP agreements entered into by the State during FY2009 with a description of each; number of jobs created under each project; new income tax revenue received from withholdings; the amounts awarded to each project as grants; and, an update on the status of projects under each agreement.

Program Description

Created in 1996, BEIP continues to be a vital economic tool for the State of New Jersey during these challenging economic times, supporting the relocation and/or expansion of over four hundred companies, the actual creation of nearly 82,000 jobs, and the estimated total capital investment of over \$12.2 billion in New Jersey.

The program is administered by the EDA, which awards grants to qualified applicants for up to 10 years. These grants can equal 10% to 80% of the total amount of state income taxes generated by the grantees' newly created jobs during the calendar year. Point-of-final purchase retail facilities are not eligible for BEIP grants.

The State also derives the benefit from ancillary revenues, such as Sales and Corporation Business Taxes, resulting from the program's associated economic growth.

To qualify for the program, a business demonstrates that the BEIP grant is a "material factor" in the company's decision to relocate to or expand in New Jersey. In addition, an applicant must demonstrate that it is financially viable, and that it will create a minimum number of jobs (a minimum of 25 jobs must be created, unless the company is within the high technology or biotechnology industries, in which case the job creation minimum is 10). The State retains the balance of the income tax revenue generated by the new jobs.

An applicant is given greater consideration if it demonstrates the creation of jobs that pay an average 1.5 times the minimum wage during the grant agreement. Qualifying businesses must also maintain the project in New Jersey for at least 1.5 times the number of years of the grant.

The company we keep,
keeps getting better.

Other factors taken into consideration that can enhance an applicant's percentage award include:

- Job creation numbers;
- Number of jobs at risk;
- Ratio of private to public investment;
- Amount of capital investment in the project;
- Average wage of the new jobs;
- Whether the project also involves construction or renovation; and
- Type of industry (companies within the high technology, biotechnology, pharmaceutical, financial services and logistics industries receive an enhanced award)

Furthermore, a bonus adjustment of up to an additional 30% can be awarded to the applicant for any one or a combination of the following:

- Location in Planning Area 1 or 2 of the State's Development and Redevelopment Plan;
- Location in Planning Area 1 or 2 and the creation of 500 or more jobs;
- Location in a former Urban Coordinating Council municipality as designated by DCA;
- Location in a brownfields site for first occupants after issuance of a No Further Action letter by DEP;
- Location in center designated by the State Planning Commission, or in a municipality with an endorsed plan;
- 10% or more of the employees receive a qualified transportation fringe of at least \$30;
- Location in an area designated by the municipality as an "area in need of redevelopment";
- Whether the project is linked to housing creation or redevelopment utilizing at least 25% of the buildable area of the site;
- Company is within 5 miles of and working cooperatively with a public or non-profit university on research and development.

The State Treasurer must certify that the amount of the withholdings received from the business for the new employees at least equals the grant amount. Grant payments only begin after the new jobs have been in existence for a year.

Overall BEIP Activity

From the inception of BEIP in 1996 through September 2009, the EDA has executed 410 BEIP agreements valued at over \$1.3 billion over the term of the grants, supporting the creation of an estimated 77,200 new jobs, and leveraging over \$12.2 billion in total public/private investment. *To date, BEIP grants have spurred the creation of 81,993 actual jobs, surpassing original estimates from the companies at the time of application.*

The company we keep,
keeps getting better.

FY2009 BEIP Activity

During FY 2009, the EDA executed 34 BEIP agreements worth an estimated \$84 million over the term of the grant (*Note: Executed projects are those in which the EDA Board has approved the project and a signed agreement between the company and the EDA has been finalized*).

The 34 projects are expected to create approximately 3,712 new jobs over the next two years. During FY2009, businesses representing these 34 projects have reported the actual creation of 629 new jobs. These projects are also anticipated to invest nearly \$228 million in private funds in New Jersey.

Attached, as *Exhibit A*, is a list of all the above projects which executed a BEIP grant agreement in FY2009, including the date of execution, award percentage, grant term, estimated job creation total, jobs created to date, estimated grant award total, total project investment, new gross income tax (estimated on projects creating jobs)¹, project location, originating city/state, and legislative district.

To date, just over \$19,000 has been disbursed to one project that executed in FY2009. (*Note: In many cases, no new gross income tax has yet been reported to the EDA by the company, as the recipient companies are not required to do so until they have reached their minimum job creation threshold*).

Also, attached, as *Exhibit B*, is a chart reflecting all BEIP grants executed to date since the inception of the program, including the FY2009 projects.

FY2009 Highlights

EDA partnered with several of the FY2009 BEIP recipients to celebrate their success and highlight their commitment to growing jobs in New Jersey, as evidenced below.

Major League Baseball Network

MLB Network launched on January 1, 2009 in approximately 50 million homes as the largest network debut in cable history, exceeding any other cable television launch by approximately 20 million. Supported by an \$8-million BEIP award, MLB Network invested approximately \$50 million in its state-of-the-art headquarters and created over 350 jobs in New Jersey. The network's 142,000-square-foot facility features "Studio 3" to honor Babe Ruth and "Studio 42"

¹ The Gross Income Tax (GIT) estimates are only reported for companies that have created jobs and achieved their Minimum Employment Threshold (MET). The MET for Tech companies is 10 jobs; for all others it is 25 jobs.

The company we keep,
keeps getting better.

to honor Jackie Robinson. MLB made significant improvements and enhancements to the facility, including the creation of a replica baseball field and an outfield wall. State leaders including Governor Jon S. Corzine, Governor's Office of Economic Growth Chief Jerry Zaro, and EDA Chief Executive Officer Caren S. Franzini welcomed the network and its employees to Secaucus at an event in February 2009.

Bausch and Lomb

New Jersey officials also welcomed Bausch & Lomb to its new global pharmaceutical headquarters in Madison in July 2009. Bausch & Lomb's 30,000-square-foot facility will create 70 new full-time, high-paying jobs in the Garden State with the support of a \$3.5-million BEIP grant. While the company maintains its worldwide headquarters in Rochester, New York, and research and development in locations worldwide, this new Madison facility establishes its pharmaceutical headquarters within a global epicenter for the industry. Bausch & Lomb is one of the best-known and most respected healthcare brands in the world. Its core businesses include contact lenses and lens care products, ophthalmic surgical devices and instruments, and ophthalmic pharmaceuticals. Founded in 1853, the company employs more than 10,000 people worldwide and its products are available in more than 100 countries.

Princeton Power Technologies

In July 2009, State leaders also visited Princeton Power Technologies in West Windsor to celebrate its rapid growth in the clean energy sector at a ribbon-cutting ceremony marking the opening of the company's new headquarters. Princeton Power was formed in a dormitory room after its founding team won first place in Princeton University's 2001 Business Plan Contest and has since grown from a staff of three to 30. Princeton Power is developing advanced power conversion technologies, including AC-link™, that provide a more reliable and cost-effective means for converting electric power cleanly and efficiently. The company has benefited from state assistance various times over the last five years. In March 2009, Princeton Power executed a BEIP grant and an Edison Innovation Fund investment from the EDA to support its expansion and relocation to the new West Windsor facility. Between 2004 and 2008, the company also received additional grants from EDA, the New Jersey Commission of Science & Technology and the New Jersey Board of Public Utilities (BPU) to support the development and commercialization of its products.

BEIP Program History

The following provides a summary of major changes made to the Business Employment Incentive Program since its inception in 1996.

The company we keep,
keeps getting better.

2003:

In September 2003, amendments were made to the BEIP Act to enhance the program, making it available to a larger range of businesses, with more targeted focus on technology-based industries, as follows:

Accelerating Business Growth and Job Creation – The program now has a lower overall job growth threshold for all applicants. Originally, a business had to create 75 new jobs to be eligible (unless they were located in a targeted municipality, in which case the threshold was 25); the threshold is now 25, regardless of location.

Fostering High Tech/Biotech Industry Growth by Lowering Job Threshold to 10 – The BEIP program was changed to target job growth in the high tech/biotech industries by having lowered the job creation threshold to 10.

Targeting Specific Industries by Increasing Grant Formula Score by 5% – An additional 5% was added to the score for specific growth industries; i.e., high tech/biotechnology, pharmaceuticals, financial services, transportation and logistics.

Encouraging Smart Growth by Increasing Grant Award by Up to 30% – Initially, BEIP applicants were eligible for a grant award of up to 80% equivalent to the total amount of the State income taxes withheld by the business during the calendar year for new employees hired. BEIP was changed to cap the award at up to 50% of state withholding, but with an additional increase of up to 30% if the company utilized Smart Growth principles, i.e.: located in either State Planning Areas 1 and 2, an Urban Coordinating Council Municipality, a "distressed" municipality as defined by the Department of Community Affairs, brownfield site, located near mass transit, located in a center designated by the State Planning Commission, or in an area designated by a locality as an "area in need of redevelopment"; linked with housing production or renovation; or, located in close proximity to and working cooperatively with a public or non-profit university on research and development.

Streamlining Reporting Process – Under the former BEIP rules, companies were required to submit a full payroll report each year, up to 10 reports for a 10-year grant. BEIP was changed to allow recipients to submit only three full reports, unless their payroll report raised questions or contained inconsistencies. The EDA however, allowed existing BEIP recipients the option of converting to the revised streamlined reporting process.

Funding Sources for BEIP – The 2003 amendments gave EDA the power to issue bonds, backed by a State contract, to fund the payment of BEIP grants in any year in which a State appropriation was not available for grants. In 2003, the EDA issued bonds for a total of \$59 million for BEIP disbursement payments for FY 2004; and, in FY2006, Governor Corzine directed

The company we keep,
keeps getting better.

that for FY2006 and in the future, payments of BEIP disbursements were to be made from the General Fund, not via bond issuance. The amendments also authorized EDA to use residual BEIP withholdings to support Designated Industries Economic Growth and Development projects. In 2003, the Joint Budget Oversight Committee approved an EDA bond resolution totaling \$60 million to fund such projects. To date, the EDA had committed \$35 million of these bond funds for the following programs: \$10 million for Springboard II Fund providing recoverable grants to start-up life sciences and high tech companies; \$10 million for investment in the new Garden State Life Sciences Venture Fund, and \$15 million for the expansion/construction of technology commercialization centers within the newly established Innovation Zones in Camden, Newark and the greater New Brunswick area. Going forward, the EDA has made a policy decision not to issue additional bonds to fund BEIP activity.

Allowing for New Recipients – The revisions also expanded BEIP benefits to companies that could not take advantage of the program due to New Jersey's reciprocal agreement with Pennsylvania. Under this agreement, New Jersey employers pay no withholding taxes in New Jersey on employees who reside in Pennsylvania. The law's amendments allowed BEIP awards to be made to companies that met all the criteria, but would otherwise be hindered by the reciprocity agreement. This initiative allowed new jobs brought by a company to the state with the BEIP incentive – but held by a Pennsylvania resident – to be factored into the BEIP grant to the employer. Grants for this initiative are generated by the residual income from the BEIP program statewide.

2004:

In 2004, New Jersey Policy Perspective (NJPP), a non-profit and nonpartisan research and educational organization, published the report “Taking Care of Business—Does it Cost Too Much?” which analyzed BEIP to determine the program's effectiveness and made recommendations for improvements. In response to the report, the State Treasurer asked Rutgers University's Edward J. Bloustein School of Policy and Planning to study the program, as well as the NJPP's recommendations, and to make any other recommendations necessary to more effectively manage the program.

Based on the Rutgers' study, the EDA Board of Directors adopted a number of modifications to the program in October 2004, including requiring BEIP recipients to maintain 80% of their statewide employment (documented at the time of application) for the grant commitment period, and imposing new guidelines governing additional incentives for jobs created in excess of the employment commitment.

In October 2004, the EDA Board of Directors also adopted additional modifications to enhance the program based on internal program review, including regulations allowing the Authority to: seek full repayment of funds if a company moves out of state; withhold, reduce or terminate

The company we keep,
keeps getting better.

payment of a grant or any portion thereof should a BEIP recipient default on the grant agreement; and, recapture grant monies already paid to the company in the event of default. In order to increase public access to information, the EDA also began posting regularly updated reports of BEIP activity on the EDA website (www.njeda.com).

2008

On January 4, 2008, Governor Jon S. Corzine signed legislation that clarified the prevailing wage applicability to workers engaged in construction or renovation incident to certain Authority assisted projects. Not less than prevailing wage rate must be paid to workers employed in the performance of any construction contract undertaken in connection with Authority financial assistance, including BEIP.

The prevailing wage requirement applies unless the work performed under the contract is performed on a facility owned by a landlord of the entity receiving the assistance and less than 55% of the facility is leased by the entity at the time of the contract and under any agreement to subsequently lease the facility. The prevailing wage requirement is also exempted from construction commencing more than two years after an entity has executed with the Authority a commitment letter regarding Authority financial assistance and the first payment or other provision of the assistance is received.

BEIP Monthly Updates

For monthly updates on executed BEIP projects, visit:
